DIVISION OF SCIENCE RESOURCES STUDIES

The Division of Science Resources Studies (SRS) fulfills the legislative mandate of the National Science Foundation Act to ...

provide a central clearinghouse for the collection, interpretation, and analysis of data on scientific and engineering resources and to provide a source of information for policy formulation by other agencies of the Federal Government...

To carry out this mandate, SRS designs, supports, and directs periodic surveys as well as a variety of other data collections and research projects. These surveys yield the materials for SRS staff to compile, analyze, and disseminate quantitative information about domestic and international resources devoted to science, engineering, and technology.

If you have any comments or suggestions about this or any other SRS product or report, we would like to hear from you. Please direct your comments to:

OFFICE OF THE
DIRECTOR

LETTER OF TRANSMITTAL

Dear Mr. President:

It is my honor to transmit to you the statistical report, *Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions: Fiscal Year 1997*, in accordance with the National Science Foundation Act of 1950, as amended.

Respectfully yours,

Rita R. Colwell
Director

The President
The White House
Washington, DC 20500

FOREWORD

Institutions of higher education, the major source of the Nation's scientists and engineers, perform about one-half of the Nation's basic research. Therefore, the level, distribution, and characteristics of Federal academic support are of much interest to officials at Federal, State, and local levels and in nongovernmental sectors.

The National Science Foundation Act of 1950, as amended, requires that the Foundation "... initiate and maintain a program for the determination of the total amount of money for scientific and engineering research, including money allocated for the construction of the facilities wherein such research is conducted, received by each educational institution and appropriate nonprofit organization in the United States, by grant, contract, or other arrangement from agencies of the Federal Government, and to report annually thereon to the President and the Congress."

To fulfill this requirement, the Foundation has utilized the data collection system originally designed by the Committee on Academic Science and Engineering of the Federal Council for Science and Technology. The Foundation annually collects statistical data from the 20 Federal agencies that account for virtually all support for

science and engineering (S&E) research and development at educational institutions. Data are also collected on these agencies' obligations to nonprofit institutions.

Since its inception, this survey system has been the sole source of data on Federal funding to individual institutions for S&E activities and therefore attracts a wide audience. These data provide information that enables users to examine patterns of support for individual institutions over time and to compare such patterns with those of other institutions.

We are grateful for the continued cooperation of the responsible staff members in the participating agencies, and we appreciate their efforts to assist us in ensuring the quality of their data submissions.

Jeanne E. Griffith
Director
Division of Science Resources Studies
National Science Foundation

ACKNOWLEDGMENTS

The preparation of *Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions: Fiscal Year 1997*, was managed by Richard J. Benno, Analyst, National Science Foundation (NSF), Division of Science Resources Studies (SRS), Research and Development Statistics Program (RDS), under the overall direction of John E. Jankowski, Jr., Program Director, RDS, with guidance and review provided by Jeanne E. Griffith, Division Director, SRS, and Ronald S. Fecso, Chief Statistician, SRS. The text was edited by

Anne Houghton, Publications Manager of SRS with assistance from Julia H. Harriston and Tanya R. Gore. Quantum Research Corp. (QRC) of Bethesda, MD, under NSF contract number SRS-9732370, prepared the tables and report copy. QRC staff members who worked on this project were Stacy R. Hade, Gail H. Henry, Hilary E. Jones, and Keri R. Leibensperger. Nita Congress, editor/communications consultant provided editorial and composition services for this report.

GETTING INFORMATION ON THE WORLD WIDE WEB

ORDER FORM

GENERAL NOTES

The data presented in these tables cover all categories of direct federal science and engineering (S&E) support to institutions of higher education, including federally funded research and development centers, in the United States for science and engineering (S&E) activities. The 20 agencies listed in these tables provide virtually all of the federal funding for S&E research and development (R&D) at U.S. universities and colleges. Data are also reported on these agencies' obligations to nonprofit institutions.

The FY 1997 data in this report were submitted by 20 federal agencies, covering the period October 1, 1996, through September 30, 1997. Data reported by the Agency for International Development; the Departments of Housing and Urban Development, Labor, and Transportation; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; the Social Security Administration; the Department of State; and the Bureau of Engraving and Printing were combined because of space constraints to constitute the "other" category in tables that show funding by agency. In 1997, these ten agencies accounted for less than 1 percent of all federal S&E academic support. In most tables that list data by agency and individual institution, the "other" column includes data from the

Department of the Interior in addition to those ten agencies. The detailed agency-specific data are available from the National Science Foundation (NSF) upon request. In 1997, the 20 agencies reported obligations to 1,140 universities and colleges, 39 academic system offices, and 963 independent nonprofit institutions.

Because of rounding, data in the text or tables may not add to the totals or subtotals shown. Reported obligations were rounded to the nearest thousand dollars.

SECTION A.
TECHNICAL NOTES

SCOPE OF SURVEY

Data presented in this report are collected annually through the National Science Foundation's (NSF's) congressionally mandated Survey of Federal Science and Engineering (S&E) Support to Universities, Colleges, and Nonprofit Institutions (the federal S&E support survey). The survey originated in 1965, when the Committee on Academic Science and Engineering (CASE) within the Federal Council for Science and Technology established the CASE data collection system to report annually on federal S&E obligations to academic institutions and associated federally funded research and development centers (FFRDCs). Since 1968, CASE data, as well as data on nonprofit institutions, also have served as the basis for an annual report to the President and Congress. This survey is designed to collect information from federal agencies on (1) total S&E program support to academic institutions, (2) total S&E support to federally funded research and development centers (FFRDCs) administered by academic institutions, and (3) research and development (R&D) and R&D plant support to nonprofit institutions and associated FFRDCs.

The data are presented in terms of federal obligations provided for direct support of academic S&E. The data exclude financial support of an indirect nature, such as funds allocated to state agencies, even if the final recipient of such funds is known to be an academic institution. Data on type of institutional control and on highest degree granted are not presented in this report but are available upon request (see "Data Availability" at the end of this section).

Obligations are the amounts for orders placed, contracts awarded, services received, and similar transactions during a given period, regardless of when the funds were appropriated and when future payment of money is required. Obligations differ from expenditures in that funds allocated by federal agencies during one fiscal year may be spent by the recipient institution either partially or entirely during one or more subsequent years.

The obligations listed for individual institutions reflect direct federal S&E support. Thus, amounts subcontracted to other institutions are included, but funds received through subcontract arrangements from prime contractors are excluded.

Obligations are listed as awards to individual institutions within a system (e.g., to the University of California, Los Angeles rather than to the University of

California system as a whole). However, obligations awarded directly to the central administration of a system are listed separately. If the final destination of the funds is not known, the agencies report them as obligations to a system's administrative office from which the funds are distributed to the system's individual institutions.

CHANGES IN REPORTING

Since these data were first collected in 1965, there have been some changes in reporting. The most recent of these include the following:

- . During the FY 1987 survey cycle, the Department of Defense (DoD) determined that some funds reported in prior years as R&D obligations to the Johns Hopkins University Applied Physics Lab (APL) were more appropriately classified as "other sciences and engineering." Data for FYs 1984 to 1986 were revised, but DoD was unable to revise data for earlier years. In FY 1997, APL accounted for more than 95 percent of DoD's total S&E funding of \$323 million to Johns Hopkins.
- . To better differentiate between that part of the federal R&D budget that supports "science and key enabling technologies" (including for military and nondefense applications) and that part that primarily concerns "testing and evaluation of large technical systems prior to production" (of mostly defense-related systems), NSF has since FY 1994, collected data on DoD development dollars in two categories: advanced technology development and major systems development.
- . Before FY 1993, NSF published data on a seventh obligations category (see "Categories of Support," below) covering non-S&E activity. Since then, however, the Department of Education has made major software modifications to the automated system from which its federal S&E data were produced. The revamped coding structure introduced major trend differences for the department's institution data. Consequently, because Education accounted for 91 percent (\$5.9 billion) of the total federal support for "non-S&E" (\$6.5 billion) for FY 1993, NSF no longer publishes non-S&E totals. To explain Education's downward academic R&D trend between FY 1993

and FY 1994 (from \$95 million to \$49 million), the agency stated that academic R&D programs in FY 1994 either were not funded, did not have an S&E component, or received reductions in funding.

CATEGORIES OF SUPPORT

The data presented here include all obligations for academic S&E: this comprises federal obligations for R&D; R&D plant; facilities and equipment for S&E instruction; fellowships, traineeships, and training grants; general support for S&E; and other S&E activities. These support categories are defined below.

1. **R&D** includes all research activities, both basic and applied, and all development activities that are supported at universities and colleges. Demonstration projects conducted to discover whether a technology or method is workable are considered to be within the scope of R&D if their objective is to produce new information within a specific time period.

R&D excludes topographic mapping and surveys, collection of general-purpose statistics, and activities concerned primarily with the dissemination of scientific information. Also excluded are routine product testing, quality control, and R&D facilities and fixed equipment.

- **Research** is defined as systematic study directed toward fuller scientific knowledge or understanding of the subject studied. Research can be classified as basic or applied, although data reported here are not separated into these categories. In **basic research**, the investigation is oriented toward gaining a better knowledge or understanding of the fundamental aspects of phenomena and of observable facts without specific applications toward processes or products in mind. In **applied research**, the investigation is aimed at gaining the knowledge or understanding necessary for determining the means by which a recognized and specific need may be met.
- **Development** is the systematic use of knowledge and understanding gained from research directed toward the production of

useful materials, devices, systems, or methods; this includes the design and development of prototypes and processes.

- **Research equipment** is included as part of R&D. It includes any item (or interrelated collection of items constituting a system) of nonexpendable tangible property or software with a useful life of more than 2 years and an acquisition cost of \$500 or more that is used wholly or in part for research.

2. **R&D plant** includes all costs—direct, indirect, and related—of all projects with the main objective of providing support for the construction, acquisition, renovation, modification, repair, or rental of facilities, land, works, or equipment for use in S&E R&D. A facility is interpreted broadly to be any physical resource important to the conduct of R&D. Excluded are expendable research equipment and office furniture and equipment.

As used here, R&D plant refers to large facilities and fixed equipment. Data on **research instrumentation** are not separately identifiable in this report. Research instrumentation funds are for equipment purchased under research project awards from current-fund accounts and are included under totals for R&D (see above).

3. **Facilities and equipment for S&E instruction** include all programs whose main purpose is providing support for the construction, acquisition, renovation, modification, repair, or rental of facilities, land, works, or equipment for use in instruction in S&E.

4. **Fellowships, traineeships, and training grants** include graduate programs in support of the development and maintenance of S&E personnel resources. The total amounts pertaining to such awards (stipends and cost-of-education allowances) are reported on the basis of the institution chosen by the recipient. Excluded are programs that support research and education institutes, seminars, and conferences such as teacher training activities provided through teacher institutes, short courses, research participation, and in-ser-

vice seminars; activities aimed at the development of education techniques and materials for use in S&E training; and programs that provide special opportunities for increasing the scientific knowledge and experience of precollege and undergraduate students. These activities are covered under “other science and engineering activities” (see category 6 below) if they are S&E-oriented.

5. **General support for S&E** includes programs that support nonspecific or generalized purposes related to scientific research and education. Such projects are generally oriented toward academic departments, institutes, or institutions as a whole. The support offered in this area ranges from that provided without any specification of purpose (other than that the funds be used for scientific projects) to that provided for activities within a specified field of S&E without a specific purpose. The National Institutes of Health’s Biomedical Research Support Grants and Minority Biomedical Support Grants are examples of this support category.
6. **Other S&E activities** are those academic S&E activities that cannot be assigned to any of the preceding five categories, including support for technical conferences, teacher institutes, and activities aimed at increasing the scientific knowledge of precollege and undergraduate students.

TYPES OF INSTITUTIONS

The types of institutions covered by this survey are universities and colleges, FFRDCs, and independent nonprofit institutions.

Universities and Colleges

Universities and colleges are those institutions of higher education in the United States that offer at least 1 year of college-level study leading toward a degree. The universe of academic institutions for this survey is derived from the higher education institution portion of the Department of Education’s Integrated Postsecondary Education Data System (sponsored by the National Center for Education Statistics) and the *1998 Higher Education Directory* (published by Higher Education Publications, Inc.).

Institutions included are those that received federal S&E support during FY 1997. This support can have been provided to any part of the academic institution—its colleges (e.g., of liberal arts) and schools (e.g., of agriculture), professional schools, hospitals, agricultural experiment stations, bureaus, offices, and research centers (excluding FFRDCs), whether located on or off the main campus or at branch campuses controlled directly by the parent institution. Further, the institutions included must have a significant degree of academic and administrative autonomy. For example, institutions within a system (a group of institutions having a collective legal status and generally recognized by a state government, a board of education, or other relevant organization) in which a significant degree of autonomy remains at the individual institution level are presented separately; while obligations to branch campuses are included in the totals for the parent institutions. Obligations to the service academies and to the U.S. Department of Agriculture Graduate School are not included.

FFRDCs

FFRDCs are R&D-performing entities formed to meet a particular federal R&D objective that cannot be met effectively by existing organizational resources. FFRDCs range from the traditional contractor-owned/contractor-operated or government-owned/contractor-operated organizational structures to various degrees of contractor/government control and ownership. The data are presented here for university-administered FFRDCs and nonprofit-administered FFRDCs. For a complete list of FFRDCs see page 10.

Independent Nonprofit Institutions

Independent nonprofit institutions are legal entities other than universities and colleges, privately organized or chartered to serve the public interest, and exempt from most forms of federal taxation. Data presented for nonprofit institutions and for nonprofit-administered FFRDCs are obligations for R&D and R&D plant reported by as many as 20 participating agencies.

Coverage of the nonprofit sector in the federal S&E support survey was expanded beginning in the late 1970s to include all types of nonprofit institutions that receive federal R&D funds. For NSF’s purposes, these types of institutions are defined as follows:

1. **Research institute:** A separately incorporated, independent nonprofit organization operating un-

- der the direction of its own controlling body whose primary function is the performance of R&D in S&E.
2. **Voluntary hospital:** This is a member of the American Hospital Association not subject to the control of either federal, state, or local governments nor an integral part of any institution of higher education. Note that hospitals that have been set up by research institutes and that, although providing patient care, function primarily as laboratories for research institutes are themselves classified as research institutes.
 3. **All other independent nonprofit institutions:**
 - **Professional or technical society or academy of science and engineering:** A voluntary association of individuals sharing a common interest in the advancement of knowledge—either within a single field or across a broad spectrum of disciplines—whose major function is to aid and encourage the collection, collation, and dissemination of S&E knowledge for the benefit of their members and the community as a whole.
 - **Private foundation:** A nongovernmental nonprofit organization, with a principal fund of its own managed by its own trustees or directors, established to maintain, aid, or facilitate social, educational, charitable, religious, or other activities serving the common welfare. Private foundations include operating foundations that allocate the greater proportion of their R&D budgets to intramural performance and philanthropic foundations that allocate most of their funds to grants and contracts for research to be performed extramurally.
 - **Science exhibitor:** A nonprofit organization whose primary goal is to expand scientific literacy within a community by providing exhibits that display and interpret the latest scientific findings within its field or fields. Included in this category are museums, zoos, botanical gardens, and arboretums.
 - **Trade association:** An organization of business competitors in a specific industry or business that is interested primarily in the commercial promotion of products or services. Membership is usually held in the name of a business entity.
- Activities may fall into one or more of the following areas: business ethics, management practices, standardization, commercial (statistical) research, publication, promotion, and public relations.
- **Agricultural cooperative:** An organization of individuals or business entities that are normally competitors in the production and sale of agricultural products. Activities may fall into one or more of the following areas: collective marketing or purchasing, research, public relations, and improvement of economic conditions for the U.S. farm population.

DATA COMPARABILITY WITH OTHER SRS STUDIES

Federal Funds for Research and Development

Data presented here on R&D and R&D plant by agency sometimes conflict significantly with similar data presented in the annual NSF survey, Federal Funds for Research and Development (or the “federal funds survey”). Much of the difference lies in the two surveys’ treatment of interagency transfers. Interagency transfers of funds obligated to an academic or nonprofit institution are reported here by the agency that actually obligates the funds to the receiving institution. In the federal funds survey, however, obligations are reported by the agency in which the funds originated.

Other differences between the data compiled by the two surveys stem from the following factors:

1. **Agencies involved:** In the present survey, data are reported by as many as 20 federal agencies on their S&E obligations to institutions of higher education; these agencies together obligate virtually all federal support to academic R&D. For the federal funds survey, budget data on R&D and R&D plant are gathered from the 32 federal agencies with such programs.
2. **Scope of information:** Data collected in the federal S&E support survey pertain only to individual academic and nonprofit institutions. Those collected in the federal funds survey relate to all types of performers. Furthermore, federal funds survey data are detailed as to character of work (basic research, applied research, and develop-

ment); data from the federal S&E support survey are not comparably disaggregated.

3. **Data sources:** The two surveys rely on different sources of data and on different methods of data collection. For example, data for the federal S&E support survey are generally processed from award files; federal funds survey data are usually derived from agency budget documents.
4. **Preparer interpretations:** Several agencies rely on personnel from separate internal offices to respond to the two surveys. These respondents frequently differ in their interpretation of survey questions. The National Institutes of Health, for example, report Biomedical Research Support Grants under "general support for science and engineering" in the federal S&E support survey, but under "research and development" in the federal funds survey.

National Patterns of R&D Resources

NSF publishes one other report related to federal R&D funding, *National Patterns of R&D Resources*. This report provides statistics on U.S. R&D expenditures categorized by provider of funds (Federal government, nonfederal government, industry, academia, and nonprofit institutions), type of performer (Federal government, industry, academia, nonprofit institutions, and federally-funded research and development centers), and character of work (basic research, applied research, and development). In the report, R&D expenditure levels from Federal sources are based on performer-reported surveys, which differ from Federal R&D funding totals reported by the Federal agencies that provide those funds. During the past several years, these differences have widened. The difference in the Federal R&D totals appears to be concentrated in the funding of industry R&D by the Department of Defense. See *National Patterns of R&D Resources: 1996* (NSF 96-333) and the forthcoming *National Patterns of R&D Resources: 1998* for detailed discussion and documentation of these differences.

DATA AVAILABILITY

Federal Science and Engineering Support to Universities, Colleges, and Nonprofit Institutions

Data published in this report are also available on the World Wide Web. Information on file formats and the years for which they are available can be found at <http://www.nsf.gov/sbe/srs/fedsuppt/start.htm>.

Integrated Academic Science and Engineering Database

Public-use tapes from the Integrated Academic Science and Engineering Database are available for purchase and will normally be shipped within 3 working days from order receipt. Data tapes from the most recent surveys (1997) are currently available; contact . NSF's Division of Science Resources Studies at (703) 306-1772 to order.

Institutional Profiles

Selected data items for individual doctorate-granting institutions and schools with S&E departments that grant a master's degree are available on computer-generated institutional profiles. An institutional profile consists of data not only from this survey, but from NSF's other two academic S&E surveys: the Survey of Research and Development Expenditures at Universities and Colleges, and the Survey of Graduate Students and Postdoctorates in Science and Engineering.

WebCASPAR

Institutional researchers can obtain data from several academic S&E resources through the Web Computer-Aided Science Policy Analysis and Research (WebCASPAR) database system, which is an easy-to-use tool for the retrieval and analysis of statistical data on academic S&E resources. WebCASPAR provides an

extensive and growing data library with multiyear statistics on the state of higher education in general and on academic S&E resources specifically. This data library is based on a set of standard institutional and field-of-science definitions across the multiple sources used to develop the database. The WebCASPAR program includes built-in help capabilities to facilitate the use and interpretation of the data.

WebCASPAR data are drawn from a number of sources. All data are available for individual institutions, by state, and at the national level. Longitudinal data from surveys of universities and colleges conducted by NSF's

Division of Science Resources Studies include the federal S&E support survey, academic R&D expenditures survey, federal funds survey, and graduate student survey cited above. Data from the Integrated Postsecondary Education Data System conducted by the National Center for Education Statistics are also included. Data from other sources include the National Research Council's assessment of research doctorate programs.

The latest version of WebCASPAR can be accessed via the World Wide Web at <http://caspar.nsf.gov/webcaspar>.

FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS

The following is a list of federally funded research and development centers (FFRDCs) included in the Federal S&E support survey. The list is arranged by sponsoring agency and administering organization (in parentheses). Respondents reported under the FFRDC category funds that were obligated to the centers identified on this list.

DEPARTMENT OF DEFENSE OFFICE OF THE SECRETARY OF DEFENSE¹

Administered by other nonprofit institutions²

Institute for Defense Analyses Studies and Analyses
FFRDC (Institute for Defense Analyses), Alexandria, VA

Logistics Management Institute (Logistics Management Institute), McLean, VA³

National Defense Research Institute (RAND Corp.⁴),
Santa Monica, CA

C3I Federally Funded Research and Development Center
(MITRE Corp.⁵), Bedford, MA, and McLean, VA

Administered by universities and colleges⁶

Software Engineering Institute (Carnegie Mellon University), Pittsburgh, PA

NATIONAL SECURITY AGENCY

Administered by other nonprofit institutions²

Institute for Defense Analyses Communications and Computing Federally Funded Research and Development Center⁷ (Institute for Defense Analyses), Alexandra, VA

DEPARTMENT OF THE NAVY

Administered by other nonprofit institutions²

Center for Naval Analyses, (The CNA Corp.), Alexandria, VA

DEPARTMENT OF THE AIR FORCE

Administered by universities and colleges⁶

Lincoln Laboratory (Massachusetts Institute of Technology), Lexington, MA

Administered by other nonprofit institutions²

Aerospace Federally Funded Research and Development Center (The Aerospace Corp.), El Segundo, CA

Project Air Force (RAND Corp.⁴), Santa Monica, CA

DEPARTMENT OF THE ARMY

Administered by other nonprofit institutions²

Arroyo Center (RAND Corp.⁴), Santa Monica, CA

DEPARTMENT OF ENERGY

Administered by universities and colleges⁶

Ames Laboratory (Iowa State University of Science and Technology), Ames, IA

Argonne National Laboratory (University of Chicago), Argonne, IL

Brookhaven National Laboratory (Brookhaven Science Associates, Inc.⁸), Upton, Long Island, NY

Ernest Orlando Lawrence Berkeley National Laboratory (University of California), Berkeley, CA

Fermi National Accelerator Laboratory (Universities Research Association, Inc.), Batavia, IL

Lawrence Livermore National Laboratory (University of California), Livermore, CA

Los Alamos National Laboratory (University of California), Los Alamos, NM

Oak Ridge Institute for Science and Education (Oak Ridge Associated Universities, Inc.), Oak Ridge, TN

Princeton Plasma Physics Laboratory (Princeton University), Princeton, NJ

Stanford Linear Accelerator Center (Leland Stanford Junior University), Stanford, CA

Thomas Jefferson National Accelerator Facility⁹ (Southeastern Universities Research Association, Inc.), Newport News, VA

Administered by other nonprofit institutions²
National Renewable Energy Laboratory¹⁰ (Midwest Research Institute), Golden, CO

Pacific Northwest National Laboratory (Battelle Memorial Institute), Richland, WA

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

Jet Propulsion Laboratory (California Institute of Technology), Pasadena, CA

NATIONAL SCIENCE FOUNDATION

Administered by universities and colleges⁶

National Astronomy and Ionosphere Center (Cornell University), Arecibo, PR

National Center for Atmospheric Research (University Corp. for Atmospheric Research), Boulder, CO

National Optical Astronomy Observatories¹¹ (Association of Universities for Research in Astronomy, Inc.), Tucson, AZ

National Radio Astronomy Observatory (Associated Universities, Inc.), Green Bank, WV

Administered by other nonprofit institutions²
Critical Technologies Institute (RAND Corp.⁴), Washington, DC

NUCLEAR REGULATORY COMMISSION

Administered by other nonprofit institutions²
Center for Nuclear Waste Regulatory Analyses (Southwest Research Institute), San Antonio, TX

DEPARTMENT OF TRANSPORTATION
FEDERAL AVIATION ADMINISTRATION
Administered by other nonprofit institutions²
Center for Advanced Aviation System Development (MITRE Corp.⁵), McLean, VA

DEPARTMENT OF THE TREASURY INTERNAL REVENUE SERVICE

Administered by other nonprofit institutions²
Tax Systems Modernization Institute (IIT Research Institute), Lanham, MD

Endnotes

- ¹ In June 1997, the Office of the Secretary of Defense replaced the Defense Advanced Research Projects Agency as sponsor of the Software Engineering Institute.
- ² That is, other than universities and colleges
- ³ Logistics Management Institute (LMI) moved from Bethesda, MD, to McLean, VA, in May 1994.
- ⁴ The following portions of the RAND Corp. are FFRDCs: Project Air Force, National Defense Research Institute (formerly Defense/Office of the Joint Chiefs of Staff), the Arroyo Center, and the Critical Technologies Institute. All other agency support to RAND is reported under nonprofit institutions.
- ⁵ Only the C3I Federally Funded Research and Development Center and the Center for Advanced Aviation System Development parts of the MITRE Corp. are FFRDCs. All other agency support to MITRE is reported under nonprofit institutions.
- ⁶ Includes university consortia
- ⁷ Although the Institute for Defense Analyses Communications and Computing FFRDC has been in existence since 1956, the Department of Defense added it to the Master Government List of FFRDCs for the first time in October 1995.
- ⁸ On March 1, 1998, Brookhaven National Laboratory acquired a new nonprofit administrator (Brookhaven Science Associates, Inc.). The previous administrator was a university consortium.
- ⁹ In May 1996 the name was changed from Continuous Electron Beam Accelerator Facility.
- ¹⁰ In September 1991 the name was changed from Solar Energy Research Institute.
- ¹¹ Since February 1984 this center has included three former FFRDCs: Cerro Tololo Inter-American Observatory, Kitt Peak National Observatory, and the National Solar Observatory (formerly Sacramento Peak Observatory).

NOTES: The Department of the Army decertified the Institute for Advanced Technology (University of Texas), Austin, TX, as an FFRDC in November 1993. All obligations previously reported to this institution should be reported under universities and colleges.

The Department of Energy removed the Inhalation Toxicology Research Institute from the Master Government List of FFRDCs in May 1996.

SECTION B.

DETAILED STATISTICAL TABLES:

FEDERAL SCIENCE AND

ENGINEERING OBLIGATIONS

To obtain accurate historical data, use only the latest detailed statistical tables (covering FY 1997) and not data published earlier. Data presented in trend tables are assembled from the most recent completed survey cycle. Data for prior years are reviewed for consistency with current-year responses and, when necessary, are revised in consultation with agencies and/or institutions. For that reason, references to prior-years' data should be restricted to those published in this document.

<i>Table</i>	<i>Page</i>
FEDERAL S&E OBLIGATIONS TO UNIVERSITIES AND COLLEGES	

Trends

B-1. Federal obligations for science and engineering (S&E) to universities and colleges, by type of activity: fiscal years 1963–97	18
B-2. Federal obligations for science and engineering (S&E) to universities and colleges, by type of activity and agency: fiscal years 1963–97	19
B-3. Federal obligations for science and engineering to universities and colleges, by geographic division and State: fiscal years 1990–97	31
B-4. Federal obligations for science and engineering to the 100 universities and colleges receiving the largest amounts, ranked by total amount received in fiscal year 1997: fiscal years 1990–97	33
B-5. Federal obligations for science and engineering research and development to universities and colleges, by geographic division and State: fiscal years 1990–97	35
B-6. Federal obligations for science and engineering research and development (R&D) to the 100 universities and colleges receiving the largest amounts, ranked by total amount received in fiscal year 1997: fiscal years 1990–97	37

Summary

B-7. Federal obligations for science and engineering (S&E) to universities and colleges, by agency and type of activity: fiscal year 1997	39
---	----

Geographic Distribution, Fiscal Year (FY) 1997

B-8. Federal obligations for science and engineering (S&E) to universities and colleges and the number of recipient institutions, by State and type of activity: fiscal year 1997	41

B-9.	Federal obligations for science and engineering to universities and colleges, by geographic division, State, and agency: fiscal year 1997	45
B-10.	Federal obligations for fellowships, traineeships, and training grants to universities and colleges, by geographic division, State, and agency: fiscal year 1997	47

100 Institutions Ranked in Order of Amount Received, FY 1997

B-11.	Federal obligations for science and engineering (S&E) to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by type of activity: fiscal year 1997	49
B-12.	Federal obligations for science and engineering to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by agency: fiscal year 1997	51
B-13.	Federal obligations for science and engineering research and development (R&D) to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by agency: fiscal year 1997	54
B-14.	Federal obligations for fellowships, traineeships, and training grants to the 100 universities and colleges receiving the largest amounts, ranked by total amount received, by agency: fiscal year 1997	57

Institutional Listings, by State, FY 1997

B-15.	Federal obligations for science and engineering (S&E) to universities and colleges, by State, institution, and type of activity: fiscal year 1997	59
B-16.	Federal obligations for science and engineering to universities and colleges, by State, institution, and agency: fiscal year 1997	83
B-17.	Federal obligations for science and engineering research and development (R&D) to universities and colleges, by State, institution, and agency: fiscal year 1997	108
B-18.	Federal obligations for R&D plant to universities and colleges, by State, institution, and agency: fiscal year 1997	148

Historically Black Colleges and Universities

B-19.	Federal obligations for science and engineering to historically black colleges and universities, ranked by total amount received in fiscal year 1997: fiscal years 1990–97	154
B-20.	Federal obligations for science and engineering (S&E) to historically black colleges and universities, ranked by total amount received, by type of activity: fiscal year 1997	156

B-21.	Federal obligations for science and engineering to historically black colleges and universities, ranked by total amount received, by agency: fiscal year 1997	158
B-22.	Federal obligations for science and engineering research and development to historically black colleges and universities, ranked by total amount received in fiscal year 1997: fiscal years 1990–97	160
B-23.	Federal obligations for science and engineering research and development to historically black colleges and universities, ranked by total amount received, by agency: fiscal year 1997	162

Systems of Universities and Colleges, FY 1997

B-24.	Federal obligations for science and engineering to systems of universities and colleges, ranked by total amount received, by agency: fiscal year 1997	164
B-25.	Federal obligations for science and engineering research and development to systems of universities and colleges, ranked by total amount received, by agency: fiscal year 1997	166

FEDERAL S&E OBLIGATIONS TO NONPROFIT INSTITUTIONS

B-26.	Federal obligations for science and engineering research and development and R&D plant to the 100 nonprofit institutions receiving the largest amounts, ranked by total amount received in fiscal year 1997: fiscal years 1990–97	168
B-27.	Federal obligations for science and engineering research and development and R&D plant to independent nonprofit institutions, by geographic division, State, institution, and agency: fiscal year 1997	170
B-28.	Federal obligations for science and engineering research and development and R&D plant to research institutes, ranked by total amount received, by agency: fiscal year 1997	194
B-29.	Federal obligations for science and engineering research and development and R&D plant to voluntary hospitals, ranked by total amount received, by agency: fiscal year 1997	200
B-30.	Federal obligations for science and engineering research and development and R&D plant to other independent nonprofit institutions, ranked by total amount received, by agency: fiscal year 1997	203

FEDERAL S&E OBLIGATIONS TO SELECTED CONSORTIA

B-31.	Federal obligations for science and engineering to selected consortia of institutions: fiscal years 1990–97	215
-------	---	-----

B-32.	Federal obligations for science and engineering (S&E) to selected consortia of institutions, by type of activity: fiscal year 1997	216
B-33.	Federal obligations for science and engineering to selected consortia of institutions, by agency: fiscal year 1997	217

FEDERAL S&E OBLIGATIONS TO FEDERALLY FUNDED RESEARCH AND DEVELOPMENT CENTERS

B-34.	Federal science and engineering (S&E) obligations to federally funded research and development centers administered by universities and colleges, by type of activity: fiscal years 1963–97	218
B-35.	Federal science and engineering obligations to federally funded research and development centers administered by universities and colleges, by agency: fiscal years 1963–97	219
B-36.	Federal science and engineering (S&E) obligations to federally funded research and development centers administered by universities and colleges, by agency and type of activity: fiscal year 1997	220
B-37.	Federal science and engineering obligations to federally funded research and development centers (FFRDCs) administered by universities and colleges, by State, institution, and sponsoring agency: fiscal years 1990–97	221
B-38.	Federal science and engineering (S&E) obligations to federally funded research and development centers (FFRDCs) administered by universities and colleges, by State, institution, agency, and type of activity: fiscal year 1997	223
B-39.	Federal science and engineering research and development and R&D plant obligations to federally funded research and development centers (FFRDCs) administered by nonprofit institutions, by State, institution, and sponsoring agency: fiscal years 1990–97	226

Table B-1. Federal obligations for science and engineering (S&E) to universities and colleges, by type of activity: fiscal years 1963-97

1 See Technical Notes, "Changes in Reporting."

2 See Technical Notes, "Categories of Support."

3 Not separately identified, but included under "Other S&E activities."

NOTE: Some trend shifts are related to institutional reclassification. Beginning in fiscal year (FY) 1978, two laboratories that were formerly considered academically administered federally funded research and development centers became part of their respective institutions: Applied Physics Laboratory (Johns Hopkins University) and Applied Research Laboratory (Pennsylvania State University). Data for these laboratories are included in the academic figures beginning in FY 1978. Similarly, Draper Laboratories separated from the Massachusetts Institute of Technology (MIT) as of FY 1974 to become an independent nonprofit institution; data for this laboratory are included in MIT's figures prior to FY 1974.

¹ See Technical Notes, "Changes in Reporting."

² Data shown for fiscal years (FYs) 1963-74 and FYs 1975-77 represent obligations of the Atomic Energy Commission and the Energy Research and Development Administration, respectively.

³ The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the FY 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

⁴ Department of Defense (DoD) research is reported separately from DoD development. FY 1994 totals for the research and development portions are not comparable to other years; DoD was not able to provide comparable data. DoD states that more than 90 percent of its development obligations reported for universities and colleges are performed at university-administered laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-17 for DoD obligations to individual institutions, by research and development breakdowns.

⁵ See Technical Notes, "Categories of Support."

⁶ Data collected before this year are not separately identified but are included under "Other S&E activities."

NOTES: Some trend shifts are related to institutional reclassification. Beginning in FY 1978, two laboratories that were formerly considered academically administered federally funded research and development centers became part of their respective institutions: Applied Physics Laboratory (Johns Hopkins University) and Applied Research Laboratory (Pennsylvania State University). Data for these laboratories are included in the academic figures beginning in FY 1978. Similarly, Draper Laboratories separated from the Massachusetts Institute of Technology (MIT) as of FY 1974 to become an independent nonprofit institution; data for this laboratory are included in MIT's figures prior to FY 1974.

Because of rounding, detail may not add to totals.

KEY:	USDA = Department of Agriculture
	BEP = Bureau of Engraving and Printing
	Com = Department of Commerce
	DoD = Department of Defense
	OEO = Office of Economic Opportunity
	ED = Department of Education
	DOE = Department of Energy
	EPA = Environmental Protection Agency
	GSA = General Services Administration
	HHS = Department of Health and Human Services
	HUD = Department of Housing and Urban Development
	Int = Department of the Interior
	AID = Agency for International Development
	OJP = Office of Justice Programs
	Labor = Department of Labor
	NASA = National Aeronautics and Space Administration
	NSF = National Science Foundation
	NRC = Nuclear Regulatory Commission
	SSA = Social Security Administration
	DOS = Department of State
	DOT = Department of Transportation
	NA = Not available
	** = Amount less than \$50,000

¹ Department of Defense (DoD) research is reported separately from DoD development. DoD states that more than 90 percent of its development obligations reported for universities and colleges are performed at university-administered laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-17 for DoD obligations to individual institutions, by research and development breakdowns.

² See Technical Notes, "Categories of Support."

³ The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submission since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

¹ This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

NOTE: The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submission since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

¹ This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Interior, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

NOTE: The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

KEY:

- USDA = Department of Agriculture
- Com = Department of Commerce
- DoD = Department of Defense
- ED = Department of Education
- DOE = Department of Energy
- EPA = Environmental Protection Agency
- HHS = Department of Health and Human Services
- NASA = National Aeronautics and Space Administration
- NSF = National Science Foundation

¹ The Department of Defense (DoD) states that more than 90 percent of its development obligations reported for universities and colleges are performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-17 for DoD obligations to individual institutions, by research and development breakdowns.

² This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Interior, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

NOTES: Does not include R&D obligations to university-administered federally funded research and development centers. See table B-38.

The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

KEY:

- USDA = Department of Agriculture
- Com = Department of Commerce
- DoD = Department of Defense
- ED = Department of Education
- DOE = Department of Energy
- EPA = Environmental Protection Agency
- HHS = Department of Health and Human Services
- NASA = National Aeronautics and Space Administration
- NSF = National Science Foundation

¹ This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Interior, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

KEY:
 USDA = Department of Agriculture
 Com = Department of Commerce
 DoD = Department of Defense
 ED = Department of Education
 DOE = Department of Energy
 EPA = Environmental Protection Agency
 HHS = Department of Health and Human Services
 NASA = National Aeronautics and Space Administration
 NSF = National Science Foundation

¹ This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Interior, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

NOTE: The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

KEY:
 USDA = Department of Agriculture
 Com = Department of Commerce
 DoD = Department of Defense
 ED = Department of Education
 DOE = Department of Energy
 EPA = Environmental Protection Agency
 HHS = Department of Health and Human Services
 NASA = National Aeronautics and Space Administration
 NSF = National Science Foundation

¹ The Department of Defense (DoD) research is reported separately from DoD development. DoD states that more than 90 percent of its development obligations reported for universities and colleges are performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies.

² The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the FY 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

NOTES: Does not include R&D obligations to university-administered federally funded research and development centers. See table B-38.

Dollars in thousands.

¹ This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

NOTE: See Technical Notes, "Categories of Support."

KEY: USDA = Department of Agriculture

Com = Department of Commerce

DoD = Department of Defense

ED = Department of Education

DOE = Department of Energy

EPA = Environmental Protection Agency

HHS = Department of Health and Human Services

Int = Department of the Interior

NASA = National Aeronautics and Space Administration

NSF = National Science Foundation

¹ The Department of Defense (DoD) states that more than 90 percent of its development obligations reported for universities and colleges are performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-17 for DoD obligations to individual institutions, by research and development breakdowns.

² This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Interior, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

KEY:
 USDA = Department of Agriculture
 Com = Department of Commerce
 DoD = Department of Defense
 ED = Department of Education
 DOE = Department of Energy
 EPA = Environmental Protection Agency
 HHS = Department of Health and Human Services
 NASA = National Aeronautics and Space Administration
 NSF = National Science Foundation

¹ This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Interior, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

NOTES: Includes obligations to every individual institution included within each system.

The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

¹ The Department of Defense (DoD) states that more than 90 percent of its development obligations reported for universities and colleges are performed at university-affiliated laboratories that are separate from the academic departments. Furthermore, DoD states that much of its development obligations are for major systems development, that such obligations differ from its obligations for advanced technology development, and that DoD total development obligations are therefore not comparable with development obligations at other Federal agencies. Refer to table B-17 for DoD obligations to individual institutions, by research and development breakdowns.

² This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Interior, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

NOTES: Includes obligations to every individual institution included within each system.

The Agency for International Development (AID) continues its long-term work on restructuring its internal database (New Management System, NMS) that will integrate the agency's budget, programming, accounting, and procurement systems. As a result, AID's response to the fiscal year (FY) 1997 Federal support survey has again been produced using an interim reporting system as it was for the FYs 1995 and 1996 surveys. Any significant differences between AID's data reported for FYs 1995-97 and data reported prior to FY 1995 can be attributed to this change in reporting systems. In addition, AID anticipates that future responses to the Federal support survey may also differ from the FYs 1995-97 submissions since the NMS, which will eventually be the database for reporting this information, will be refined to produce more accurate data.

¹ The fiscal year (FY) 1992, 1993, and 1994 obligations from the Department of Defense (DoD) to the Rand Corporation were mostly reported to three federally funded research and development centers administered by the Rand Corporation: Project Air Force, the Arroyo Center, and the National Defense Research Institute. FY 1991 obligations from DoD for the four entities were all reported as the Rand Corporation.

Table B-27. Federal obligations for science and engineering research and development and R&D plant to independent nonprofit institutions, by geographic division, State, institution, and agency: fiscal year 1997

¹ This column displays data for the following agencies, if they reported obligations in the variables represented by this table: the Departments of Housing and Urban Development, Labor, State, and Transportation; the Agency for International Development; the Bureau of Engraving and Printing; the General Services Administration; the Nuclear Regulatory Commission; the Office of Justice Programs; and the Social Security Administration.

KEY:

- USDA = Department of Agriculture
- Com = Department of Commerce
- DoD = Department of Defense
- ED = Department of Education
- DOE = Department of Energy
- EPA = Environmental Protection Agency
- HHS = Department of Health and Human Services
- Int = Department of the Interior
- NASA = National Aeronautics and Space Administration
- NSF = National Science Foundation

National Astronomy & Ionosphere Center (National Science Foundation)	6,178	8,516	11,750	9,466	10,135	7,669	8,271	8,244

¹ Since February 1984, this center has included three former FFRDCs: Cerro Tololo Inter-American Observatory, Kitt Peak National Observatory, and the National Solar Observatory (formerly Sacramento Peak Observatory).

² Obligations reported to the Jet Propulsion Laboratory include sizable amounts that are subcontracted, principally to industrial firms.

³ The Department of the Army decertified the Institute for Advanced Technology (University of Texas), Austin, TX, as an FFRDC in November 1993.

⁴ In May 1996 the name was changed from Continuous Electron Beam Accelerator Facility.

NOTE: University consortia, as well as individual universities and colleges, administer FFRDCs. Refer to Section A, Technical Notes, "Federally Funded Research and Development Centers" for a list of FFRDCs by agency and administering institution.

KEY: NA = Not applicable

¹ The following portions of the RAND Corp. are FFRDCs: National Defense Research Institute (formerly Defense/Office of the Joint Chiefs of Staff), Project Air Force, the Arroyo Center, and the Critical Technologies Institute. All other agency support to RAND is reported under nonprofit institutions.

² In September 1991 the name was changed from Solar Energy Research Institute.

³ The Department of Energy removed the Inhalation Toxicology Research Institute from the Master Government List of FFRDCs in May 1996.

⁴ Only the C3I Federally Funded Research & Development Center and the Center for Advanced Aviation System Development parts of the MITRE Corp. are FFRDCs. All other agency support to MITRE is reported under nonprofit institutions.

⁵ Logistics Management Institute moved from Bethesda, MD, to McLean, VA, in May 1994.
